 As at: 2026-10-07

## Section A - safety cut-outs

| Item                                                       | Setting | Date       | Comments                                    |
|------------------------------------------------------------|---------|------------|---------------------------------------------|
| No1 compressor - Test the high pressure cut-out            | 24bar   | 2026-10-07 |                                             |
| No1 compressor - Test the low pressure cut-out             | 0.0bar  | 2026-10-07 |                                             |
| No1 compressor - Test the oil pressure cut-out             | working | 2026-10-07 | This is a flow switch not a pressure switch |
| No1 compressor - Test the high temperature cut-out         | probe   | 2026-10-07 |                                             |
| No2 compressor - Test the high pressure cut-out            | 24bar   | 2026-10-07 |                                             |
| No2 compressor - Test the low pressure cut-out             | 0.0bar  | 2026-10-07 |                                             |
| No2 compressor - Test the oil pressure cut-out             | working | 2026-10-07 | This is a flow switch                       |
| No2 compressor - Test the high temperature cut-out         | probe   | 2026-10-07 |                                             |
| No3 compressor - Test the high pressure cut-out            | 24bar   | 2026-10-07 |                                             |
| No3 compressor - Test the low pressure cut-out             | 0.0bar  | 2026-10-07 |                                             |
| No3 compressor - Test the oil pressure cut-out             | working | 2026-10-07 | This is a flow switch.                      |
| No3 compressor - Test the high temperature cut-out         | probe   | 2026-10-07 |                                             |
| Pack controls - Test the high pressure cut-out rdm         | 23bar   | 2026-10-07 |                                             |
| Pack controls - Test the low pressure cut-out rdm          | 0.2bar  | 2026-10-07 |                                             |
| Pack controls - Test the high pressure cut-out rdm back-up | 23bar   | 2026-10-07 |                                             |
| Pack controls - Test the low pressure cut-out rdm back-up  | 0.2bar  | 2026-10-07 |                                             |

## Section B - safety cut-outs

| Item                                               | Setting | Date       | Comments                            |
|----------------------------------------------------|---------|------------|-------------------------------------|
| No1 compressor - Test the high pressure cut-out    | 24bar   | 2026-10-07 |                                     |
| No1 compressor - Test the low pressure cut-out     | 0.0     | 2026-10-07 |                                     |
| No1 compressor - Test the oil pressure cut-out     | working | 2026-10-07 | This is a flow switch not pressure. |
| No1 compressor - Test the high temperature cut-out | probe   | 2026-10-07 |                                     |
| No2 compressor - Test the high pressure cut-out    | 24bar   | 2026-10-07 |                                     |
| No2 compressor - Test the low pressure cut-out     | 0.0bar  | 2026-10-07 |                                     |

*The work that **keeps you working.***

| Item                                                       | Setting | Date       | Comments                            |
|------------------------------------------------------------|---------|------------|-------------------------------------|
| No2 compressor - Test the oil pressure cut-out             | working | 2026-10-07 | This is a flow switch not pressure. |
| No2 compressor - Test the high temperature cut-out         | probe   | 2026-10-07 |                                     |
| Pack controls - Test the high pressure cut-out rdm         | 24bar   | 2026-10-07 |                                     |
| Pack controls - Test the low pressure cut-out rdm          | 0.2bar  | 2026-10-07 |                                     |
| Pack controls - Test the high pressure cut-out rdm back-up | 23bar   | 2026-10-07 |                                     |
| Pack controls - Test the low pressure cut-out rdm back-up  | 0.2bar  | 2026-10-07 |                                     |

### Section C - safety cut-outs

| Item                                                   | Setting  | Date       | Comments                |
|--------------------------------------------------------|----------|------------|-------------------------|
| No1 unit / compressor - Test the high pressure cut-out | 21bar    | 2026-10-07 |                         |
| No1 unit / compressor - Test the low pressure cut-out  | 0.2bar   | 2026-10-07 |                         |
| No1 unit / compressor - Test the oil pressure cut-out  | working. | 2026-10-07 | Cut out on 90sec delay  |
| No2 unit / compressor - Test the high pressure cut-out | 21bar    | 2026-10-07 |                         |
| No2 unit / compressor - Test the low pressure cut-out  | 0.2bar   | 2026-10-07 |                         |
| No2 unit / compressor - Test the oil pressure cut-out  | working. | 2026-10-07 | Cut out on 90sec delay. |
| No3 unit / compressor - Test the high pressure cut-out | 21bar    | 2026-10-07 |                         |
| No3 unit / compressor - Test the low pressure cut-out  | 0.2bar   | 2026-10-07 |                         |
| No3 unit / compressor - Test the oil pressure cut-out  | working. | 2026-10-07 | Cut out on 90sec delay  |
| No4 unit / compressor - Test the high pressure cut-out | 21bar    | 2026-10-07 |                         |
| No4 unit / compressor - Test the low pressure cut-out  | 0.2bar   | 2026-10-07 |                         |
| No4 unit / compressor - Test the oil pressure cut-out  | working  | 2026-10-07 | Cut out on 90sec delay. |

### Section D - safety cut-outs

| Item                                                   | Setting  | Date       | Comments                  |
|--------------------------------------------------------|----------|------------|---------------------------|
| No1 unit / compressor - Test the high pressure cut-out | 20bar    | 2026-10-07 |                           |
| No1 unit / compressor - Test the low pressure cut-out  | 0.1bar   | 2026-10-07 |                           |
| No1 unit / compressor - Test the oil pressure cut-out  | working. | 2026-10-07 | Cut out after 90sec delay |
| No2 unit / compressor - Test the high pressure cut-out | 20bar    | 2026-10-07 |                           |
| No2 unit / compressor - Test the low pressure cut-out  | 0.1bar   | 2026-10-07 |                           |
| No2 unit / compressor - Test the oil pressure cut-out  | working  | 2026-10-07 | Cut out after 90sec delay |
| No3 unit / compressor - Test the high pressure cut-out | 20bar    | 2026-10-07 |                           |
| No3 unit / compressor - Test the low pressure cut-out  | 0.1bar   | 2026-10-07 |                           |
| No3 unit / compressor - Test the oil pressure cut-out  | working. | 2026-10-07 | Cut out after 90sec delay |

| Item                                                   | Setting  | Date       | Comments                   |
|--------------------------------------------------------|----------|------------|----------------------------|
| No4 unit / compressor - Test the high pressure cut-out | 20bar    | 2026-10-07 |                            |
| No4 unit / compressor - Test the low pressure cut-out  | 0.1bar   | 2026-10-07 |                            |
| No4 unit / compressor - Test the oil pressure cut-out  | working. | 2026-10-07 | Cut out after 90sec delay. |

## Section E - safety cut-outs

| Item                                                      | Setting | Date       | Comments                   |
|-----------------------------------------------------------|---------|------------|----------------------------|
| E1 unit No1 compressor - Test the high pressure cut-out   | 23bar   | 2026-10-07 |                            |
| E1 unit No1 compressor - Test the oil pressure cut-out    | working | 2026-10-07 | Cut out on 90sec delay     |
| E1 unit No2 compressor - Test the high pressure cut-out   | 23bar   | 2026-10-07 |                            |
| E1 unit No2 compressor - Test the oil pressure cut-out    | working | 2026-10-07 | Cut out after 90sec delay  |
| E1 common switches - Test the common low pressure switch  | 0.0bar  | 2026-10-07 |                            |
| E1 common switches - Test the common high pressure switch | 23.5bar | 2026-10-07 |                            |
| E2 unit No1 compressor - Test the high pressure cut-out   | 23bar   | 2026-10-07 |                            |
| E2 unit No1 compressor - Test the oil pressure cut-out    | working | 2026-10-07 | Cut out after 90sec delay. |
| E2 unit No2 compressor - Test the high pressure cut-out   | 23bar   | 2026-10-07 |                            |
| E2 unit No2 compressor - Test the oil pressure cut-out    | working | 2026-10-07 | Cut out after 90sec delay. |
| E2 common switches - Test the common low pressure switch  | 0.0bar  | 2026-10-07 |                            |
| E2 common switches - Test the common high pressure switch | 23.5bar | 2026-10-07 |                            |
